PRESS RELEASE

Alien Abduction — A True Story Relives a Famous UFO 1975 Incident

Radnor, PA (January 31, 2018) —Onwings Productions proudly presents a documentary about kidnapping, time travel, disinformation, and extraterrestrial encounters in ***Alien Abduction—A True Story***.

Filmmaker Jennifer W. Stein and co-producer Bob Terrio have produced an 82-minute film recounting the now-world-famous 1975 UFO encounter in the Sitgreaves National Forest of seven loggers heading home, and the alien abduction of one who got too close, logger Travis Walton.

The film, ***Alien Abduction—A True Story*** was five years in the making. All living members of the original logging crew are featured, with interviews (then in 1975 and now) with the police sheriff and deputy, and the Ariz. chief polygraph expert. UFO experts contribute as well: Stanton Friedman, Kathleen Marden, Ben Hansen, James Fox, Peter Robbins, Lee Spiegel, and David Jacobs.

The true story has never been told in a documentary film and Stein felt compelled to capture these testimonies now, for the public record and for the next generation.

“Bob Terrio and I undertook this project with Travis, because Hollywood would not, or could not tell the true story of Travis Walton. The truth is far more interesting and important for everyone to know and understand. Humanity pays a price for keeping these stories secret. Future generations are left in the dark putting the pieces together like detectives in a crime scene gone cold. Truth is always difficult, but often the better choice from the start.”

“I acknowledge the bravery of Travis and his fellow logging crew-members who could have debunked this story because of the unfavorable media attention it was getting. They could have saved themselves from years of ridicule and claimed it was all a hoax, but they never did.... They all stuck to the truth, their story, all these 40 years in spite of the ridicule they endured. The film shows how this event challenged their lives and changed them forever.”

2018 marks the 43rd anniversary of the Travis Walton incident. A sleepy community, Holbrook, in northeast Arizona, then reluctant to admit that this incident actually happened, in 2014 and 2015 commemorated the event on November 5, 1975 with a three-day conference attracting researchers, UFO skeptics/enthusiasts, and the media.

Coordinators included Jennifer W. Stein, (Pa. section director-Mutual UFO Network), Gary Hilton, Travis Walton, Alejandro Rojas, Karen Brard, Peter Robbins, Ron Williams, Ben Hansen, Stacy Wright and Jim Mann, State Directors for MUFON-AZ. Additional support provided by Ron James and Stanton Friedman.

Anniversary events continued in 2016 and 2017 in Los Angeles, Calif. and Pittsburgh, Pa. featuring a special screening event with Travis Walton. In 2018, the event November 5 returns to the Los Angeles area.

This revised 2018 edition, ***Alien Abduction—A True Story***, is ready for a distributor and or network-only purchase. The newly-edited 82-minute documentary includes new archived footage, interviews with additional witnesses, crew members and experts, and additional eye-opening tree ring research. This version is not available for online streaming or retail DVD sales, nor is it set to screen at any upcoming events.
